Result = Revenue Growth

India Internet Sector Total Revenue

2009-2025 (\$MM)

**16 YR. COMPOUND ANNUAL
GROWTH RATE* = ~35%**

Source: EMQQ Global LLC, Bloomberg LP, As of February 2026

*CAGR—or “Compound Annual Growth Rate”—is the annualized rate of growth in the value of an investment or financial metric over a stated period.

The Problem with Traditional India ETFs

We believe traditional India-focused strategies have failed investors.

**Missing the Internet:
Low Overlap of
Holdings with INQQ**

**Higher Exposure
to State-Owned
Enterprise (SOE*)**

**Lower Revenue
Growth Rates vs
INQQ**

Sources: EMQQ Global, Bloomberg, Data as of 12/31/2025

State-owned enterprise (SOE) is a business entity created or owned by a national or local government, either through an executive order or legislation.

Carefully consider the Fund's investment objectives, risk factors, charges and expenses before investing. This and additional information can be found in the Fund's prospectus, which may be obtained by visiting www.emqqglobaletfs.com. Read the prospectus carefully before investing.

Investing involves risk, including the possible loss of principal. Investments in smaller and mid-sized companies typically exhibit higher volatility. The fund is non-diversified. International investing may involve risk of capital loss from unfavorable fluctuations in currency values, from differences in generally accepted accounting principles, or from economic or political instability in other nations. Emerging markets involve heightened risks related to the same factors as well as increased volatility and lower trading volume. Frontier markets generally have less developed capital markets than traditional emerging market countries, and, consequently, the risks of investing in foreign securities are magnified in such countries. These countries are subject to potentially significant political, social and economic instability, which could materially and adversely affect the companies in which the Fund may invest. The Fund invests in the securities of Internet Companies, including internet services companies and internet retailers, and is subject to risk that market or economic factors impacting technology companies and companies that rely heavily on technology advances could have a major effect on the value of the Fund's investments.

Investing in India may involve the risk of capital loss from unfavorable fluctuations in currency values, from differences in generally accepted accounting principles, or from economic or political instability in India as well as increased volatility and lower trading volume. Certain restrictions on foreign investment may decrease the liquidity of the Fund's portfolio, subject the Fund to higher transaction costs, or inhibit the Fund's ability to track the Index. The Fund's investments in securities of issuers located or operating in India may be limited or prevented, at times, due to the limits on foreign ownership imposed by the Reserve Bank of India ("RBI").

The Fund is registered as a foreign portfolio investor ("FPI") with the Securities and Exchange Board of India ("SEBI") in order to have the ability to make and dispose of investments in Indian securities. There can be no assurance that the Fund will qualify or continue to qualify as an FPI, or that the Indian regulatory authorities will continue to grant such qualifications and the loss of such qualifications could adversely impact the ability of the Fund to make and dispose of investments in India.

Exchange Traded Concepts, LLC serves as the investment advisor to the INQQ ETF. The Fund is distributed by SEI Investments Distribution Co. (SIDCO) which is not affiliated with Exchange Traded Concepts, LLC.
